| Organizations thrive by taking risks, but falter when risks are not managed effectively. Risks are inherently present in the work we do at CalSTRS, which is why we implement internal controls, to mitigate these inherent risks. However, the possibility of residual risk, after all actions are taken to mitigate risk, does exist. |  |        | controls | t Risk<br>nout any actions or<br>in place to reduce<br>d or impact. | very high   |        | 41-50<br>31-40 |  |
